I spoke with Kristine following our Milestone Meeting and here is what I propose for a path forward.

Kristine will develop a proposal based on the discussion we have had to date. The proposal will present a range of options for characterizing stormwater that can be applied on a land-use basis. This will be routed to the technical team for input by Friday. The technical team will have until November 26th to provide input. I recommend that we schedule a joint technical/management team meeting for the afternoon of November 28, 2006 to discuss this topic. This meeting would be similar to our framework discussions with a technical session running from 1 - 3 and a management team session from 3 - 5.

The technical team discussion should consist of the people who attended last Wednesday's technical session with the addition of Bruce Hope. The management team meeting should consist of our regular management team with a few additions (e.g., Keith Johnson, Karen Tarnow, Kristine Koch). The objective of the discussion is to reach agreement on what needs to happen this year, where it needs to happen and who does it.

Let me know if this is workable. Valerie, can you set us up with a room?

Thanks, Eric

RE: Meeting notes from 10/8  
Sampling Methodology Workgroup

Thanks, Eric--and Keith. I will make th3 28th work as well. And I agree that the tech folks should get as much clarity as they can on the appropriate sampling approach. I can not tell how much progress they were able to make at their last meeting, but I still think we need a relatively simple matrix showing the techniques that could be employed for the various purposes: source control, contribution to water column and recontamination. In addition, we need to get some relative certainty as to what various parties are committing to do so we can see what else might be needed for this water year's effort. Have a good afternoon.

I too can meet on the 28th. I do think it would be worthwhile for the technical folks to get together prior to the management team meeting to finalize their recommendation(s) to the management team.

Eric

Keith - I checked my calendar and spoke with Chip and here is what we propose...

I will draft a process and schedule for the technical team review by Nov 20th. All comments will be due by Nov. 26 so that I can assimilate them on Nov. 27 and send out to the managers. A managers meeting would then be held on the afternoon of Nov. 28th.

Does this work for everyone?

Sampling Methodology Workgroup

I suggest the Kristine could assemble a draft timeline for the workgroup, get comments via email or a conf call, then submit that for manager's to review on the week of the 20th or 27th at the latest.

Kristine, does this seem reasonable?

Keith

Thanks, Kristine and Karen--and all who are working on this important effort. One thing that strikes me is the timing of the work. I think it will be important to meet again much sooner than the 28th in order to provide the managers with material they can use for further conversations on the next steps forward. I hope there is a way to push this farther and faster. Thanks again for the good efforts.

Karen - Thank again for setting up this meeting. I think that it was very productive and we got a long way in the process! I'll work on this

(b) (6)

All - Let me know if there is anything you would like for me to add/consider/contemplate in adding to this by early next week. I suggest that we get back together the last week of Nov (when Karen returns) to finalize something to submit to the Managers. I suggest the afternoon of 11/28 since I'll already be in Portland for a meeting in the morning. Let me know if that works for you.

Meeting notes from 10/8 Sampling  
Methodology Workgroup

Thanks to all for a very collegial and productive discussion yesterday!  
Special thanks to Nicole and crew for providing us with a robust  
sampling plan to fuel our discussion, and to Kristine for volunteering  
to take the lead on this effort during my absence.

As you'll see from the notes, we covered a lot of ground but also have a  
bit of work to do. Since we did not talk about a timetable at the  
meeting, I suggest that Kristine propose a schedule and communicate with  
the group about next steps.

Thanks - see you at the end of the month.

Karen
